The Director

13 April 1950

The Assistant General Counsel

1. The staff of the Immigration Subcommittee of the Senate Judiciary Committee has requested certain information which they desire prior to going to conference on the Displaced Persons legislation. They would like this information by 18 April.

2. They are concerned regarding 5,000 refugees in the Venezia-Giulia area, half of whom they believe to be displaced Jews, many with communist orientation. They would like such information as we could supply them as to the orientation of this group of refugees, their ringleaders, whether there is a pronounced communist orientation there, and such general information as we can supply them in this connection.

3. They are also desirous of information regarding 4,000 Shanghai refugees, most of whom are believed to be White Russians. The Committee feels that this group is particularly susceptible to penetration, and would like some information as to the extent which we believe this to be true.
